

Applied Data Science Project

"Generation of video reviews based on textual descriptions"

Checkpoint I:

- Objective(s)
- Service design
- Functional diagram
- Gantt
- A brief spoiler

Project and Goals

- New technologies is being released at ever increasing speed
 - More than 600 phones released in 2021
 - On *icecat*, 8068 technical devices released in 2021
- This is a chore for consumers: this translates in huge costs both in terms of *time* and *clarity*
- Producing reviews for so many products is a huge investment in human resources

Project and Goals

12

RESPONSIBLE
CONSUMPTION
AND PRODUCTION

- The project is in line with the 12th SDGs: [sustainable consumption](#) and [production](#)
- The [objective](#) is to increase the chance of a better match between customer and products
- The [output](#) will be a model capable of producing reviews both in textual and in slideshow-speech formats, starting from structured data
- This will allow creating [amounts](#) of reviews for tech devices in an [easily digestible](#) format, to be used both by companies and consumers

Where we're starting from

"credit where credit's due"

- **The Datasets:**
 - Product catalog
 - Reviews with entity recognized.
- **The NER:**

A Customised Named Entity Recognition model

John

Waiter

20 - 35 y.o.

“

Clarity is true elegance

PROFILE

BACKGROUND

John is a dynamic waiter and works in a restaurant in the center of Turin. He is also passionate about music production, so he needs a smart way to plan and manage his day. Technology attracts him, but he is not very confident with it.

Digital Savviness

[Level of familiarity with the digital world]

Tech expertise

[Knowledge of the technology]

Frequency of usage

[How often do you use the service]

NEEDS AND FRUSTRATIONS

OBJECTIVE

John is searching for simple and clear information about the products to buy

NEEDS

- Have a trustable source of information
- Easy comparison of a large amount of products
- Have an engaging media to retrieve the information

FRUSTRATIONS

- Textual reviews are boring and hard to digest
- Some characteristics are too specific, so they are not meaningful for his research
- Finding reviews on different websites can be dispersive

Emily

Web Developer

35 - 45 y.o.

“

You can always do better

PROFILE

BACKGROUND

Emily works in a prestigious tech company as a web developer. Speed, concreteness and time management are crucial aspects for her life.

Digital Savviness

[Level of familiarity with the digital world]

Tech expertise

[Knowledge of the technology]

Frequency of usage

[How often do you use the service]

NEEDS AND FRUSTRATIONS

OBJECTIVE

Emily's goal is to find accurate product reviews and quickly comparing the large amounts of suitable products

NEEDS

- Have a specific and detailed description of the product
- Need feedbacks from other advanced users
- Have a trustable source of information

FRUSTRATIONS

- User reviews are often made by non-domain experts
- Some descriptions are too generic
- Information is often incomplete or untrustworthy

Emma

Reviewer

35 - 45 y.o.

“

Work smarter not harder

PROFILE

BACKGROUND

New-technologies enthusiast, Emma is a reviewer for upcoming tech products on the website www.findyourdevice.com. Technology is her passion, her work and possibly an important tool to help her in her duties

Digital Savviness

[Level of familiarity with the digital world]

Tech expertise

[Knowledge of the technology]

Frequency of usage

[How often do you use the service]

NEEDS AND FRUSTRATIONS

OBJECTIVE

Emma needs a tool to help her in her job of writing reviews for upcoming tech products.

NEEDS

- Have a tool to support and ease her activities
- Maximize the efficiency of her work
- Jump from static textual reviews to more dynamic media

FRUSTRATIONS

- It's hard to give complete and non-ambiguous reviews of the products
- Cold-starting for each and every review takes up a lot of time

JOHN, 25-30 y.o., Waiter

Scenario: Jhon is a waiter passionate about music. He wants to buy some new good noise-cancelling headphones for when he comes home from work

Expectations:

- clear online information in an easily digestible format
- ability to filter products according to his needs
- quickly find a matching product

DEFINE

AWARNESS

RESEARCH

COMPARE

PURCHASE

ADVOCACY

Actions

1. Consider current headphones
2. Define most-desired features

3. Ask friends and coworkers
4. Follow Google ads

5. Browse e-commerce platforms
6. Search "best noise cancelling headphones" online and browse tech-reviews websites

7. Start comparing products
8. Search for video reviews on Youtube

9. Decide the new product to buy
10. Perform the purchase

11. Suggest the product to your friends
12. Leave a review

Touch-points

Reviewing system

Improvements

Build efficient algorithms to intercept users' needs

Have an all-in-one place with text and video reviews
Allow for ad-hoc filtering

Have a website that does the comparisons and stores the desired products

Allow for several payment methods

Give some rewards for leaving reviews and answering surveys

End Users

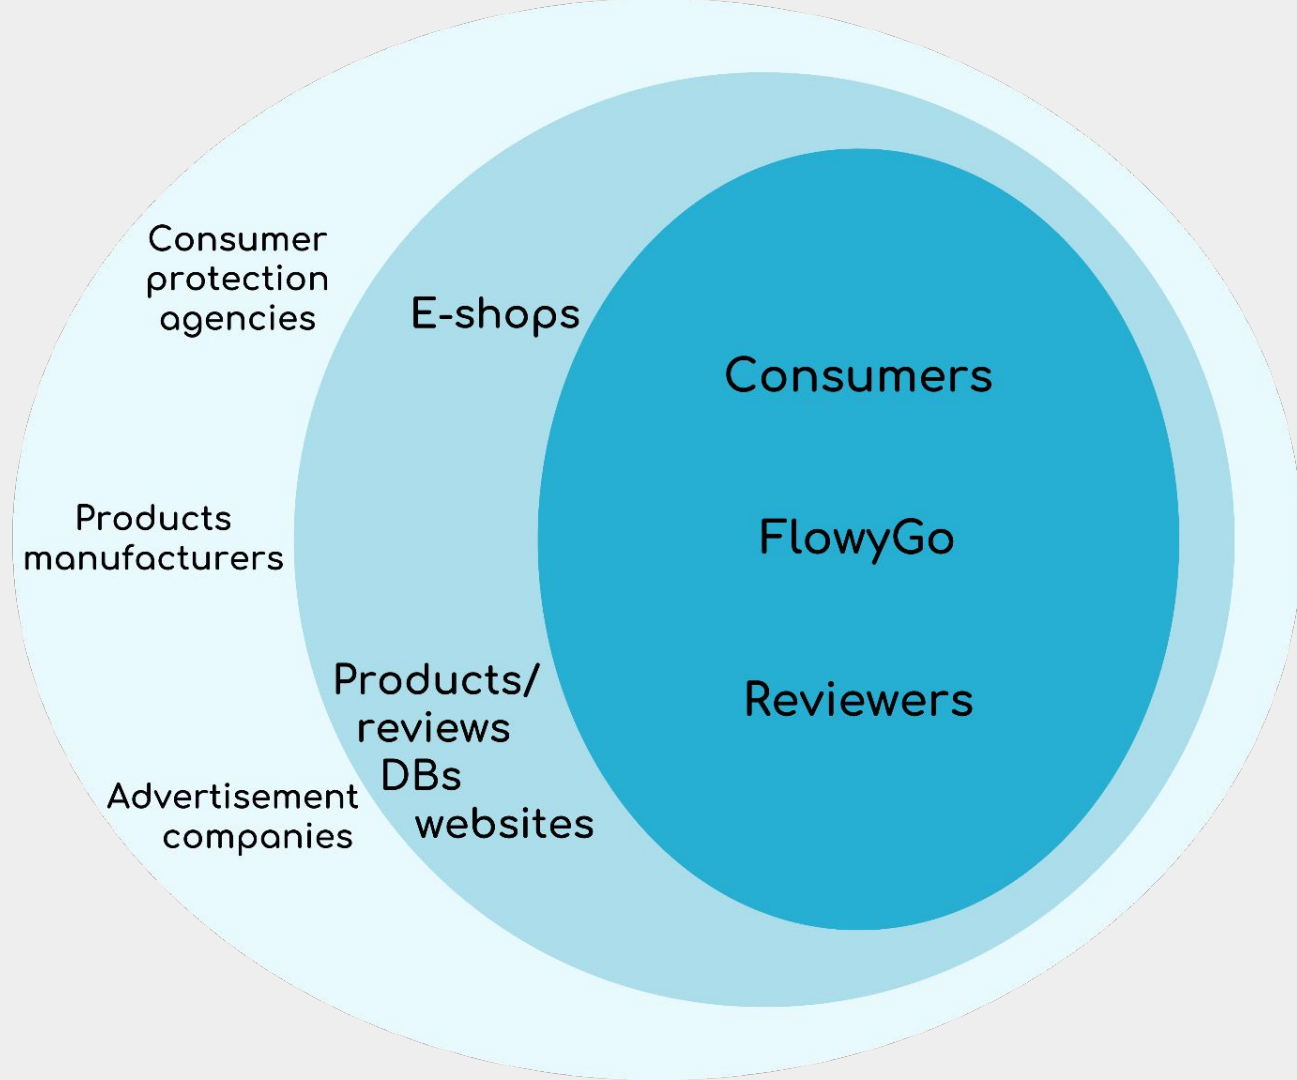

Direct and indirect entities that will interact with the system and/or outputs.

Secondarily affected

Entities who will be somewhat strongly affected even if not directly interacting with the system

Indirectly affected

Entities who will be indirectly affected by the presence of the service

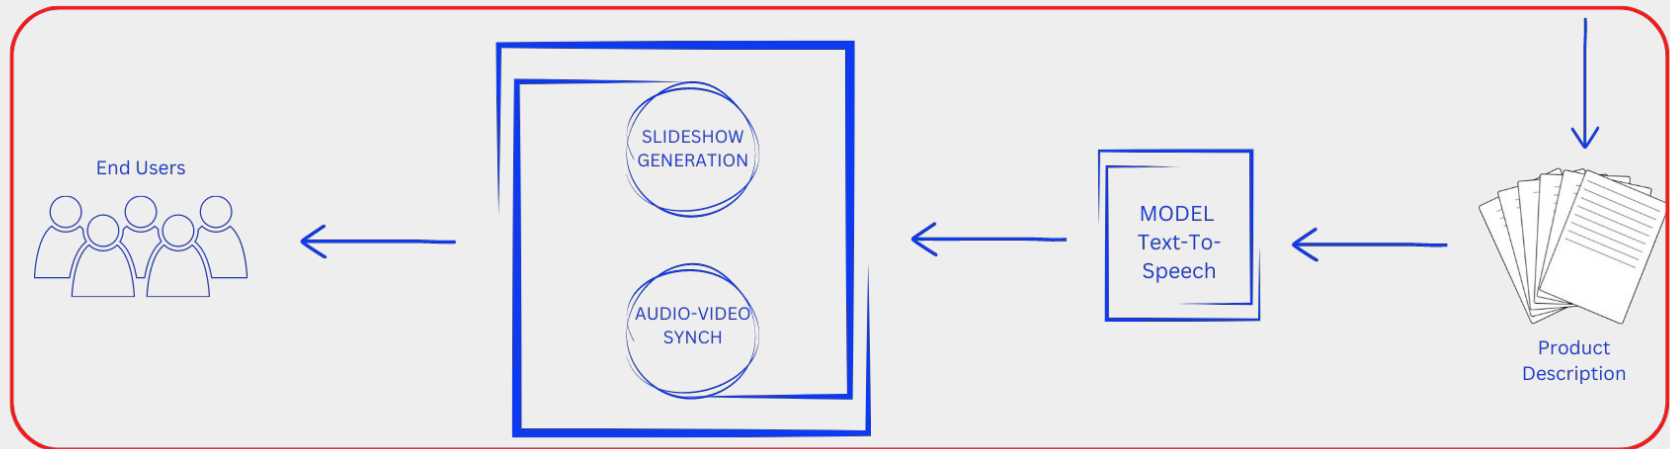

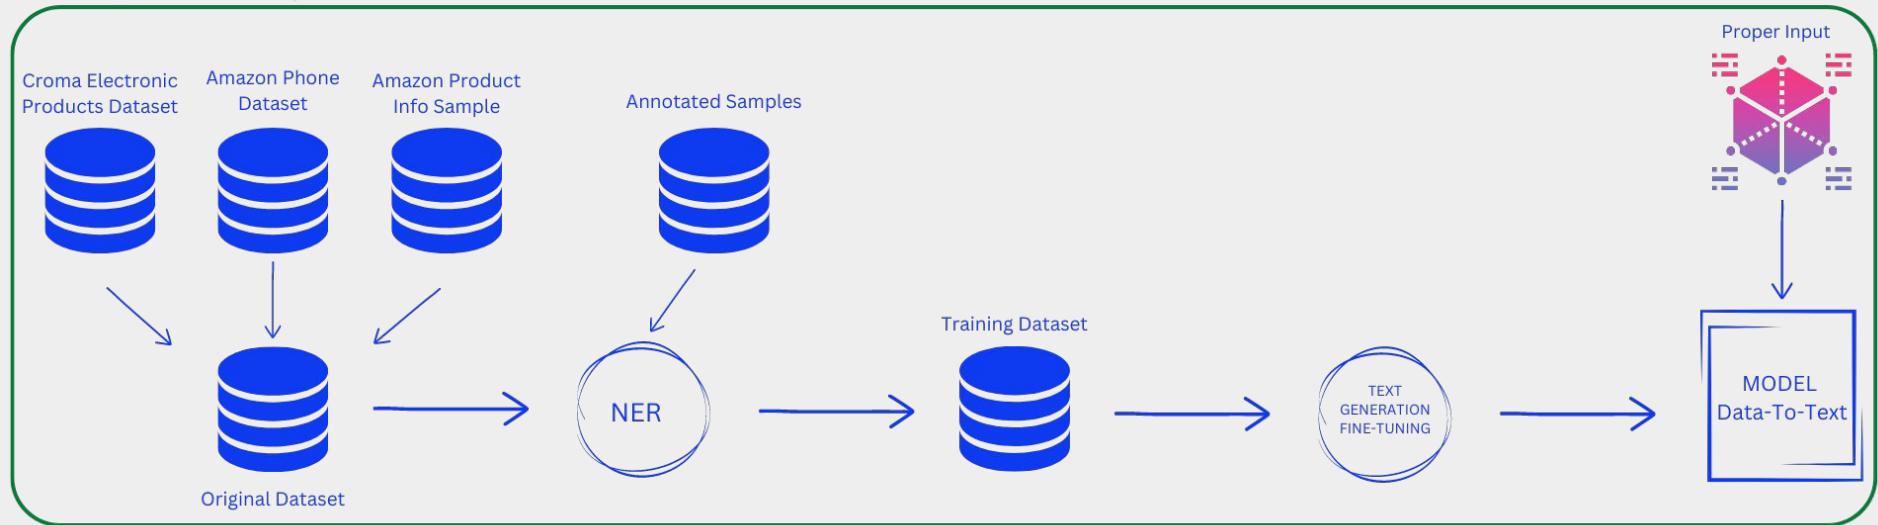

FUNCTIONAL REQUIREMENTS

No.	Requirement	Notes	Category
1	Users should be able to compare products by filtering by specifying features, such as screen size, price or range	N/A	Technical
2	The system will provide both a text review and a video (slideshow) review of the desired product(s)	N/A	Technical

NON FUNCTIONAL REQUIREMENTS

No.	Requirement	Notes	Category
1	The system provide a review in a reasonable time	N/A	Technical
2	The reviews achieve a minimum threshold in terms of clarity/ readability/ coherence	N/A	Technical
